<p><b>Number of buildings:</b></p> <p>Auditors should count all buildings that are part of the facility, whether residents are formally allowed to enter them or not. In situations where temporary structures have been erected (e.g., tents) the auditor should use their discretion to determine whether to include the structure in the overall count of buildings. As a general rule, if a temporary structure is regularly or routinely used to hold or house residents, or if the temporary structure is used to house or support operational functions for more than a short period of time (e.g., an emergency situation), it should be included in the overall count of buildings.</p>	1
<p><b>Number of resident housing units:</b></p> <p>Enter 0 if the facility does not have discrete housing units. DOJ PREA Working Group FAQ on the definition of a housing unit: How is a "housing unit" defined for the purposes of the PREA Standards? The question has been raised in particular as it relates to facilities that have adjacent or interconnected units. The most common concept of a housing unit is architectural. The generally agreed-upon definition is a space that is enclosed by physical barriers accessed through one or more doors of various types, including commercial-grade swing doors, steel sliding doors, interlocking sally port doors, etc. In addition to the primary entrance and exit, additional doors are often included to meet life safety codes. The unit contains sleeping space, sanitary facilities (including toilets, lavatories, and showers), and a dayroom or leisure space in differing configurations. Many facilities are designed with modules or pods clustered around a control room. This multiple-pod design provides the facility with certain staff efficiencies and economies of scale. At the same time, the design affords the flexibility to separately house residents of differing security levels, or who are grouped by some other operational or service scheme. Generally, the control room is enclosed by security glass, and in some cases, this allows residents to see into neighboring pods. However, observation from one unit to another is usually limited by angled site lines. In some cases, the facility has prevented this entirely by installing one-way glass. Both the architectural design and functional use of these multiple pods indicate that they are managed as distinct housing units.</p>	0

# Audit Findings

## Audit Narrative (including Audit Methodology)

*The auditor's description of the audit methodology should include a detailed description of the following processes during the pre-onsite audit, onsite audit, and post-audit phases: documents and files reviewed, discussions and types of interviews conducted, number of days spent on-site, observations made during the site-review, and a detailed description of any follow-up work conducted during the post-audit phase. The narrative should describe the techniques the auditor used to sample documentation and select interviewees, and the auditor's process for the site review.*

On August 30, 2021, the Management and Communications Group, LLC (CMCG) located in Florida contracted with Demetrius Henderson, United States Department of Justice Certified PREA Auditor to conduct a PREA audit at Alston Wilkes Columbia Residential Reentry Center (CRRC) located in Columbia, South Carolina.

Alston Wilkes Columbia Residential Reentry Center (CRRC) is a 56-bed secure community confinement facility that houses male and female residents 18 years and older. The Bureau of Prisons refer residents to the facility for residential reentry. The facility is accredited by the American Correctional Association (ACA), and received PREA accreditation in 2018

### Audit Methodology

#### Pre-Audit Preparation:

The audit process started on September 15, 2021, with the Certified PREA-Auditor (CPA) meeting the PREA Coordinator/PREA Compliance Manager to receive the facility's documents. On September 18, 2021, the CAP started reviewing the facility's documents given to by the PREA Coordinator/PREA Manager for CRRC. The CPA reviewed the Facility's policies and procedures related to PREA Standards. The CPA reviewed the PRE-Audit Questionnaire (PAQ) which identified the current population at 44 inmates and a 12-month average inmate population of 46. There were no letters from Residents addressed to the CPA.

The CPA viewed CRRC website that describes the Facility's mission "Rebuilding lives for a safer community". The website informed the CPA that Austin Wilkes has four residential reentry facilities located in Columbia, SC, Florence, SC, Charleston, SC, and Fayetteville, NC. The four residential reentry facilities annually house approximately 626 residents.

There were no letters from residents addressed to the CPA. PREA posting notifying residents of the upcoming PREA audit was posted in advance by the facility. On September 1, 2021, the facility sent the CPA pictures to confirm the CPA's information was posted in the facility ahead of the scheduled PREA audit.

Alston Wilkes Columbia Residential Reentry Center (CRRC) has a recently signed memorandum of understanding with Pathways to Healing to provide residents with confidential emotional support services related to sexual abuse and to help victims of sexual abuse during their transition from CRRC into the community. Any sexual abuse investigations are completed by an external entity the BOP.

Internet search of the facility confirmed no litigation of federal consent decrees. General and specific information about the facility and the programs and services provided are detailed on the facility's website. The facility's website also contains PREA information on zero-tolerance and coordinated response

policies. The PREA audit report for the 2018 audit is located on the website and it also contains the third-party PREA reporting form.

### **Entrance Briefing and Site Visit:**

The onsite visit for the Prison Rape Elimination Act (PREA) compliance audit for Alston Wilkes Columbia Residential Reentry Center (CRRC) was held on October 13-14, 2021, by Demetrius Henderson, United States Certified PREA Auditor (CPA). The population for the first day for CRRC was 44 residents and 44 residents the second day. The rated capacity is 56. The average range of residents is between 18-62 years of age. The average population for the past 12 months was 100 days

On October 13, 2021, an entrance meeting initiated the onsite audit with the CPA, PREA Coordinator (PC)/PREA Compliance Manager (PCM), Facility Director, and Director of Human Resources (HR). During the meeting, the PREA- Auditor outlined his auditing process and transparency communication, sampling and scheduling of interviews, discussion of logistics for the facility tour, and the need to review additional documents. The CPA discussed the need to review by camera any area quarantined because of COVID. The CPA communicated the need to review the entire facility, interview a minimum of five (5) targeted residents and five (5) random residents. Specialized Staff interviews were completed electronically, and the CPA conveyed the need to interview at a minimum ten (10) random staff members. The facility provided the CPA with an updated PRE-Audit Questionnaire, hard documents of completed specialize staff interview questionnaires, documentation on PREA policies and procedures and the facility's sexually abusive behavior prevention and intervention program as it relates to the PREA standards. Specialized staff interviews: 10 residents completed interviews and ten (10) random staff members were interviewed. The following is a breakdown of all interviews completed by staff and residents.

The hospital's Sexual Assault Policy provides that a Sexual Assault Nurse Examiner (SANE) will conduct the examinations. According to the Hospital's written Policy, when a SANE is not available, the Emergency Department Physician and Emergency Department Nurse will assume care of the patient and follow the protocols outlined in the Policy. Case Managers augment this scheduling by working alternate schedules to ensure coverage. Current facility policy is to check living areas at least hourly at night. Hourly checks are documented. The Facility has a capacity of 56 residents. During the time of the onsite visit, 44 residents were being housed at the Facility.

Documentation reviews confirm there has been no judicial findings of inadequacy, findings of inadequacy from federal investigation agencies or findings of inadequacy from internal or external oversight bodies.

These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Review of CRRC Policy H1402 states the Facility does not conduct cross gender strip searches or cross gender visual cavity searches. The policy further states that staff shall not search or physically

examine a transgender or intersex resident for the sole purpose of determining resident genital status. Staff interviewed confirmed the policy and staff stated they did not perform cross gender searches.

The facility has a policy that enable residents to shower, perform bodily functions, and change clothing without nonmedical staff of the opposite gender viewing their breasts, buttocks, or genitalia, except in exigent circumstances or when such viewing is incidental to routine cell checks. Staff and resident interviews confirmed the facility policy is being implemented. Staff training records/interviews verify staff receiving training on cross gender pat searches and searches on transgender and intersex residents. During the onsite visit there were no female residents or transgender residents housed in the Facility.

Based on staff and resident interviews, document reviews and observation during the onsite visit, the Facility is meeting standard 115.215.

The agency does not conduct criminal investigations. The agency only performs administrative investigations involving any staff on resident sexual misconduct. The facility only houses federal residents at the Columbia facility from the FBOP

The Facility offers all victims of sexual abuse access to forensic medical examinations at an outside facility, without financial cost, where evidentiary or medical appropriate in accordance with the standard. This discussion must also include corrective action recommendations where the facility does not meet the standard. These recommendations must be included in the Final Report, accompanied by information on specific corrective actions taken by the facility.*

Review of CRRC Policy H1202 states and based on interviews with the facility's intake staff and random residents, all residents are assessed during the intake screening and upon transfer to the facility for their risks of being sexually abused by other residents or sexually abusive toward other residents.

Interviews with residents confirmed intake screening takes place within 72 hours of arrival to the facility. CRRC uses an assessment that is an objective screening instrument. During the onsite visit there were no resident admitted. The CPA reviewed the assessment to see how staff used data of victimization and abusiveness during intake.

The intake screening included at minimum, the following criteria to assess residents for risk of sexual victimization: Whether the resident has a mental, physical or developmental disability; The age of the resident; The physical build of the resident; Whether the resident has previously been incarcerated; Whether the resident's criminal history is exclusively nonviolent; Whether the resident has prior convictions for sex offenses against an adult or child; Whether the resident is or is perceived to be gay, lesbian, bisexual, transgender, intersex or gender nonconforming; Whether the resident has previously experienced sexual victimization; and The residents own perception of vulnerability.

The initial screening considers prior acts of sexual abuse, prior convictions for violent offenses, and history of prior institutional violence or sexual abuse, as known to the agency, in assessing residents for risk of being sexually abusive. A resident's risk level is reassessed when warranted due to a referral request, incident of sexual abuse, or receipt of additional information that bears on the resident's risk of

sexual victimization or abusiveness. The residents are not to be disciplined for refusing to answer or for not disclosing complete information in response to questions asked.

Only management staff have access to the risk screening form such as medical, mental health, Executive Director, Facility Director as well as the PREA Coordinator.
